Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a cooking chamber system for a cooking device, classified in class 99, subclass 473.
- II. Claims 11-15, drawn to a method for cooking in a cooking chamber of a cooking device, classified in class 426, subclass 523.

The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group I as claimed can be used to practice another and materially different process, e.g., for use in sterilizing particulate materials such as powdered cosmetics and pharmaceuticals. Moreover, the method of Group II can be practiced without the specifics of the Group I apparatus such as at least one pipe, a turbine wheel, a control device, a cooling device, a pressure sensor, a blower motor, a motor for turning the blower, and a widened portion below the opening.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1761

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
